

DBA Lead - Vancouver, BC Full-time

Company Description

Caskadia is recruiting on behalf of a San Francisco based start-up who has just received a large VC Series A funding and is ready to launch an amazing product to revolutionize how HR departments use their talent and will transform the future of work. The company goal is to help large organizations break down silos and create more agile work environments.

Through their platform, they intelligently connect employees to projects and roles where they will have the most impact and personal growth. The result: happier employees, greater productivity and a new world of work.

Job Description

As the DBA Lead, you will be a key member of their technical leadership team at the Vancouver software development office while reporting to the CTO / Co-Founder in SF.

Responsibilities

- Highly personable SQL expert that can coordinate work to ensure delivery based on Enterprise SLAs. 5/5
- Perform database design and scripting
- Assist in debugging of scripts and application upgrade support
- The lead will take some of the day-to-day coordination with the Vancouver development office and San Francisco product team including
- Utilize your excellent “soft skills” – interaction with the San Francisco team, and Vancouver Developer team - involvement in projects and meetings, etc.

Qualifications

- 5+ years DBA and Relational Database-as-a-Service Experience
- Familiar with software including any or all of the following: SQL Server, Neo4j, MongoDB, Microsoft Azure
- Strong team player with good communication skills.
- A passion for the problem we’re solving
- Excellent communication, including the ability to converse at a technical level
- Strong data, metrics, and analysis skills
- Skills and interest in the areas of Growth, Mobile, or Developer Platforms
- Excited to help out with User Research, Developer Evangelism, or Team Processes
- A blend of management, technical, creative, business, and marketing skills
- Demonstrated strong capabilities in communication - both oral and written - and presentation skills for all levels of audience
- Capability to execute rapidly and efficiently in an unstructured environment
- BS in Computer Engineering/Science, related technical field or equivalent practical experience.

Additional Information

About the client: The company is venture backed by the most prestigious and successful Venture Capital firms and is on an IPO track to be the market leader in this space. The management of the company have successfully launched, grown and led multi-billion dollar tech companies in the past. This is an opportunity rarely available in Vancouver.
